PROFILE SUMMARY

A seasoned and dedicated web developer with years of specialized experience in front-end development, skilled in crafting responsive, visually captivating websites, and optimizing user interfaces for enhanced user experiences. Known for embracing challenges and proactively seeking opportunities for growth and innovation.

SKILLS

JavaScript	TypeScript	React js	Next js	Angular
Node js	Python	Django	Mongo Db	React Native

WORK EXPERIENCE

Front End Developer   Mar, 2023 – Present
Hardcore Biometric Systems

- Implemented UI interfaces for diverse data capturing devices, including print scanners and iris scanners, utilizing a micro frontend architecture with React. Enhancing reusability and accessibility across all applications, fostering modularity and scalability.
- Utilized Formik alongside other techniques to manage large and complex forms within data-intensive applications, enhancing user experience and data accuracy.
- Utilized Vite to establish inter-application communication, enabling efficient exposure and accessibility of applications to one another.
- Employed React Query and Redux to effectively manage and synchronize complex application states, resulting in enhanced performance and responsiveness.
- worked in an agile environment with daily standups, tracked user stories, and participated in sprint planning and weekly retrospectives.

Front End Developer   Jan, 2024 – Apr, 2024

Helping Hands   website-link

- Integrated Stripe frontend payment functionality using Next js, enhancing the platform's e-commerce capabilities and facilitating secure online transactions for users.
- Leveraged React-Redux Query for efficient state management and seamless integration with backend APIs, ensuring real-time data updates and enhancing user experience.
- Implemented Chart.js and React-Table-Query to visualize and display complex data sets effectively, providing users with insightful analytics and actionable insights.
- Utilized Tailwind CSS to streamline frontend styling and achieve a consistent and modern design aesthetic across the platform, enhancing visual appeal and user engagement.

Front End Developer

Brifia   website-link

Feb, 2024 – Apr, 2024

- Developed a website using React.js, leveraging its powerful component-based architecture to create a dynamic and interactive user interface.
- Implemented multiple translations within the website, providing support for users in different languages and enhancing accessibility and usability on a global scale.
- Utilized Styled Components and Tailwind CSS for efficient and modular styling, ensuring a consistent and visually appealing design across the website while maintaining scalability and ease of maintenance.

Dec, 2023 – Apr, 2024

Front End Developer

AOT Logistics   website-link

- Developed a robust website for a logistics company using Next.js, harnessing its server-side rendering capabilities to ensure fast performance and SEO optimization.
- Integrated Google Maps and React Google Maps to provide interactive and intuitive map functionalities, enhancing route planning and location tracking features for users.
- Leveraged React Query to handle data fetching and caching, enhancing performance and responsiveness while optimizing network requests.

EDUCATION

Civil Engineering/ B.Eng   2015 – 2021

Federal University Of Technology Minna
